NAIL FIN INSTALLATION

EASY NAIL FIN INSTALL

New Zealand's next generation installation system. 360 degree hidden flange, seals perfectly against building wrap for faster installation, giving a superior weather and air tight seal.

TITANIUM UV PROTECTION

Tropical strength TiO2 UV stabilized uPVC formula construction, for extended New Zealand durability and high thermal performance.

LOW SOUND TRANSFER

The Multi Chamber uPVC profile design drastically reduces external noise penetration.

10 POINTS OF QUALITY

All units factory inspected adhering to ISO performance quality control.

TRIPLE GASKET AWNING SEALS

Triple sealing gaskets in all Awning units ensures full Air Condition rated pressure compliance for improved energy efficiency.

ROBOTIC HEAT WELDED CONSTRUCTION

CAD-CAM manufacturing ensures accurate cut dimensions. Thermally welded together for consistent quality, perfectly sealed corners and superior deflection strength.

NEXT GENERATION THERMAL PERFORMANCE

Ultra low conductive uPVC frames, coupled with CARDINAL® Lo-E argon gas filled double glazing, boasts a minimum R value of 0.68 - Exceeding all 2023 NZ Build Code requirements.

REMOVABLE INSECT SCREENS INCLUDED

Removable, low visible screens that do not impede unit operation.

LESS CONDENSATION, LESS HEAT LOSS
